OASIS STANDARD

UBL HISC Status Report

- UBL Human Interface Subcommittee

- chair:
  - G. Ken Holman, Crane Softwrights Ltd.

- no activity since June 2005
  - committee members focused on UBL 2.0 and code lists

- looking for renewed membership and activity

Subcommittee objectives

- write output formatting specifications as guides to implementers of stylesheets and presentation applications

- write input data-entry specifications as guides to implementers of human user interfaces
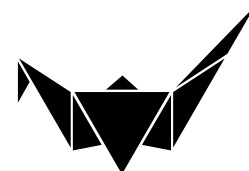

End of earlier work

- developed XPath file concepts

- started modifying UBL 1.0 formatting specifications for UBL 2.0 document models

- mechanics of formatting specifications determined (based on Docbook markup)
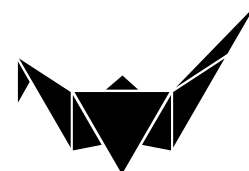

End of earlier work (cont.)

- layouts based on United Nations Layout Key

- no business expertise on board to decide:
  - which layouts to use for UBL 2.0 document models
 - which UBL 2.0 information items to use in layouts

Start of new work

- refined XPath file details

- new committee members for assistance editing formatting specifications

- still need new committee members for business decisions

Start of new work (cont.)

- awaiting SBSC schemas in order to co-ordinate HISC work in support of SBSC work
    - the formatting specifications will format SBSC instances

Can you contribute?

- the committee needs additional energy and resources
